Software Developer

Strong technical skills with proven record of delivering software excellence.

Goal-oriented and self-motivated Software Developer with experience and academic qualification in designing, coding and debugging web technologies on multiple platforms. Excellent analytical skills with ability to identify and provide technical solutions to complex issues. Keen collaborator with outstanding communication, interpersonal and multi-tasking skills. Adept at maintaining up to date knowledge of web front-end industry standards, best practices and trends.

*Front-End / Web Development / User Interface Design / Usability Testing / Technical Support
Information Architecture / Troubleshooting & Issue Resolution*

TECHNICAL PROFICIENCIES

Front End: HTML5, CSS, SASS, jQuery, NgxBootstrap, Material UI, Chart.js, Angular, React, JavaScript, TypeScript, Ajax, XML, JSON

Databases: SQL (MySQL), MongoDB, Firebase

Other Tools: **Backend-**Node.JS; **Deployment-** GitHub, Heroku, Jenkins; **Cloud-**AWS; **Debugging-** Chrome Tools, Redux DevTools, Visual Studio, Google Analytics, Python

PROFESSIONAL EXPERIENCE

Web Developer (4/2019 – 4/2020)

11 Health & Technologies, Irvine Ca

Technical Scope: Angular 7,8, MVC Pattern, Jira, GitHub

Developed technical designs and code for existing and new products, with strong focus on quality, performance and maintainability. Collaborated with designers, back-end developers, and product stakeholders to deliver solutions. Created rich, interactive user-experiences with modern technologies.

Key Contributions:

- Performed applications development in Angular 7,8, Typescript using MVC pattern.
- Created solutions feature components via Angular CLI, routing, lazy loaded modules, NGRX state management implementation, CRUD, formgroup validation, and added graphs and charts to different projects.
- Created and published Angular libraries on Definitions via GitHub Package Registry and Verdaccio.
- Published schematics on Angular Material code parts in NPM.
- Ensured quality by performing rigorous angular unit tests with Jasmine/ Karma to identify potential and existing design flaws, and proactively troubleshoot and resolve them.
- Utilized Jira for work management, Sprint environment, daily standups to identify and track dependencies and project impediments and risks.

Page Two

Web Developer (3/2019)

UCR Extension, Riverside, Ca

Technical Scope: UI kit, Node.js, Express.js, Passport.js, Handlebars, SQL

Performed development on **Better Health app** meant for promoting health and wellness. Produced and implemented high quality front-end web applications and features to create ease of navigation and simplicity for customers. Defined development practices and coding architecture that supported a secure, high performance, and maintainable web application with optimal resource utilization.

Key Contributions:

- Developed RESTful API that enabled the retrieval medical records and helped add dynamic updates for a profile page.
- Enhanced software functionality by writing tests Mocha and Chai and performing Postman RestAPI testing.
- Participated in the creation of a reliable customer database with profile and records pages.

FastBuy Service Purchasing / Customer Service (10/2013 – 3/2019)

Fishisfast LLC, Sugar Land, TX

Technical Scope: Software utilized - Asana, Trello, Slack, Intercom

Oversaw all aspects of FastBuy Service Coverage function for over five years, which included order processing, tracking, problem-solving, negotiations with follow-ups both with the customers and sellers.

Key Contributions:

- Actively collaborated with admin and warehouse team members to coordinate and implement internal tasks.
- Maintained high levels of customer service at all times, while multi-taking efficiently within a deadline-oriented environment.

EDUCATION AND TRAINING

Business Administration Degree, 2012

UAS, Helsinki

Technical Certifications

Full Stack Web Development UCR Extension, Riverside Coding Bootcamp, 2019

Python Learning (In progress)
